Entering the professional world is for young people a delicate moment of rupture and transition, a moment that may involve disagreements and even conflicts. What are the main challenges young people face in this process? What tools can help overcome these difficulties?

In the framework of the SNSF Agora project “Costruire spazi di dialogo per la risoluzione dei conflitti” (“Building dialogue spaces to solve conflicts”), we discuss about the concepts of ‘rupture’ and ‘transition’, elaborated within cultural psychology with:

Prof. Tania Zittoun, UNINE
Prof. Jonas Masdonati, UNIL

The event is open to the public and will be in English.
